EXPERIMENT3

AIM:

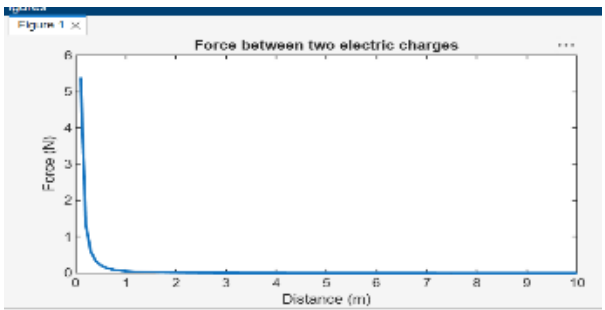

To determine and plot the Force of attraction between two electric Charges and two parallel conductorsseparated by varying distance between them using MATLAB.

Test case (i) Determination and plotting of force between two electric charges with varying distance

PROGRAM:

```
clc;
clear;
q1 = input('Enter the charge q1=');
q2 = input('Enter the charge q2=');
epsilon = 8.854e-12;
k = 1/(4*pi*epsilon);
r = linspace(0.1,10,100);
F = k*q1*q2./(r.^2);
disp('Force at r = 1 m is:');
disp(k*q1*q2/(1^2));
plot(r,F,'LineWidth',2);
xlabel('Distance (m)');
ylabel('Force (N)');
title('Force between two electric charges');
```

OUTPUT:

Test case (ii) Determination and plotting of force between two electric charges with differentmagnitudes

PROGRAM:

```
clc;
q1 = 5e-6;
q2 = 2e-6;
epsilon = 8.854e-12;
k = 1/(4*pi*epsilon);
```

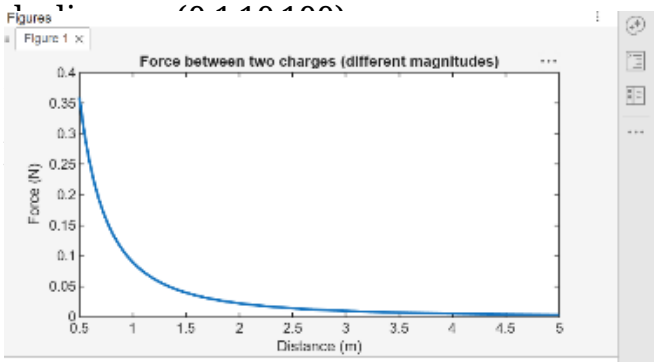

```
r = linspace(0.5,5,100);
F = k*q1*q2./(r.^2);
plot(r,F,'LineWidth',2);
xlabel('Distance (m)');
ylabel('Force (N)');
title('Force between two charges (different magnitudes)');
```

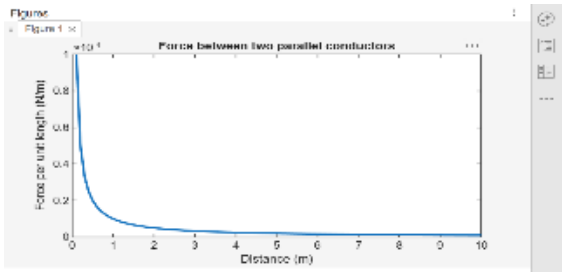

OUTPUT:

Test case (iii) Determination and plotting of force per unit length between two parallel conductors with varying distance

PROGRAM:

```
clc;
mu0 = 4*pi*1e-7;
I1 = 5;
I2 = 10;
```

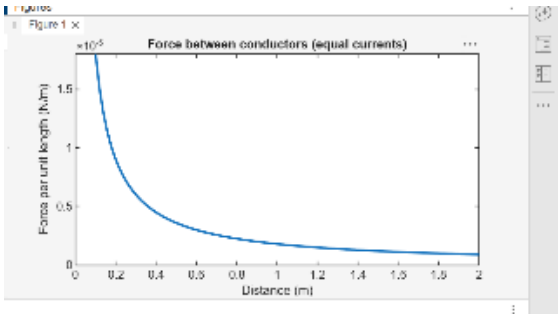

Test case (iv) Determination and plotting of force between two parallel conductors carryingequal currents

PROGRAM:

```
clc;
mu0 = 4*pi*1e-7;
I1 = 3;
```

```
I2 = 3;
d = linspace(0.1,2,100);
F = (mu0*I1*I2)./(2*pi*d);
plot(d,F,'LineWidth',2);
xlabel('Distance (m)');
ylabel('Force per unit length (N/m)');
title('Force between conductors
(equal currents)');
```

OUTPUT:

RESULTS:

Thus the program was verified for the force of attraction or repulsion acting along a straight line between two electric charges is directly proportional to the product of the charges and inversely to the square of the distance between them using MATLAB was successfully.

S. No.	Objective	Assessment Criterion	Excellent – 4	Good – 3	Satisfactory – 2	Needs Improvement – 1	Weighting (%)	Marks given	Marks obtained
1	Identify physical quantities and force models	Identify physical quantities and force models	Correctly identifies charge/ current, separation, medium and force direction for both	Identifies most quantities and models correctly.	Needs guidance in selecting the correct relation or direction.	Uses incorrect force models or quantities..	25	2.5	

2	Calculate electric and magnetic forces	Calculate electric and magnetic forces	cases.	Calculations are mostly correct with minor errors..	Some calculations are correct but require assistance.	Force calculations are invalid or absent	25	2.5	
3	Evaluate force versus separation	Evaluate force versus separation	Correctly varies separation, plots trends and checks theoretical distance dependence	Trend and plots are correct with minoromissio ns.	Limited sweep or incomplete trend interpretation.	Does not establish a valid relationship.	30	3	
4	Explain and report results	Explain and report results	Explains attraction/ repulsi on and reports assumptions, units and conclusions clearly.	Conclusion is correct with minor documentation gaps.	Conclusion is incomplete or partly inaccurate.	Conclusion is missing or incorrect.	20	2
